## How to interpret the Red text for an IP Address:

An IP Address usually represents a unique computer that belongs to an individual. A **bold red color text** for an IP address on the report indicates that the same IP Address was used more than once and that there could be a problem with the authenticity of the References that a Candidate has provided. The following scenarios would trigger the **bold red color text**:

- If the Candidate IP Address is in red text, this means that the Candidate's IP address also matches the IP Address of one or more of the provided References
- If the Candidate IP address is not in red text, but one or more the References have a matching IP address in red text

We cannot guarantee that the above situations definitely mean that the references are not authentic. There is a possibility that Candidates and References can have the same IP address for legitimate reasons. For example, this may happen when some organizations have a corporate security policy where all outgoing traffic to the Internet is set to the same IP Address.

In instances where the Candidate and References do not work for the same organization, there is an increased probability that it's an issue with authenticity.
